

AZORA BUSINESS OVERVIEW

Bring your business problems into focus.

Connect the people, work and evidence behind your next business decision, starting with the problem that matters most.

01

Business & People

Project Management, HR & People and Management OS.

02

Product & Operations

Engineering & Product Development, and Operations & Manufacturing.

03

Quality & Documents

Quality Management, and Documents & eSign.

A CLEARER WAY TO WORK

1

Name the problem

2

Bring the context

3

Agree the action

4

Review the evidence

Start with one problem. Keep the wider business in view.

Illustrative workflow - discuss your scope in a walkthrough.

Bring one business problem.

Let's walk through how your team could work with Azora.

A practical starting point.

A delivery commitment is at risk. Engineering, operations and quality need to compare open work and agree who takes the next step.

FOR BUSINESS OWNERS AND TEAMS COORDINATING WORK ACROSS DEPARTMENTS

01**Name the problem**

Describe the delivery issue and the decision the team needs to make.

02**Bring the context**

Review relevant project, product, operations and quality records.

03**Agree the action**

Give the next task a named owner and a clear due date.

04**Review the evidence**

Return to the recorded work and results at the next team review.

START WITH ONE REAL PROBLEM

Start with one problem. Keep the wider business in view.

Agree the workflow, the people and what success would look like.

Illustrative approach; setup and supported scope are agreed together.

Bring one business problem.

Let's walk through how your team could work with Azora.
